Machinery Directive 2006/42/EG

Our products do not fall under the scope of the Machinery Directive 2006/42/EG.

Our products do not fall under the definition 'machinery' in Article 2 a) or 'partly completed machinery' in Article 2 g) Machinery Directive. The term 'machinery' demands a specific application that is not present in our products. In addition, our products are not considered as 'partly completed machinery' which requires an assembly which is almost machinery. Reason is that our products can be used for many different purposes. Nevertheless, our products can be incorporated in an installation that is considered as machinery. In this case the manufacturer of the machinery must ensure that the final machinery complies with the statutory provisions.
