

Information on Substances in Articles

According to Regulation (EC) No

1907/2006 (REACH)

The European regulation REACH requires that suppliers of products (articles) must inform their customers in case an article contains a substance of very high concern in a concentration above 0,1 weight by weight (w/w) which is listed in the 'Candidate List' published by the European Chemicals Agency (ECHA).

Considering the Candidate List of ECHA in the last updated version on July 08th 2021, we can provide you the information that our supplied products do not need to be declared according to Article 33 (1) of the REACH Regulation. Our products do not contain substances which are currently listed in the Candidate List of ECHA in a concentration above 0,1 w/w.

This information is based on data from our suppliers which we have received up to the present day. Analytical testing is not routinely performed by us.
